## Question 1

---

Question Type: MultipleChoice

---

Which one of the following options is a dedicated throughput testing application, usable on both the WLAN and LAN?

Options:

- A- WLAN scanner
- B- Wirestart
- C- iPerf
- D- NLTSH

P2P  
exams

Answer:

C

## Question 2

---

Question Type: MultipleChoice

---

What are the two most common industry-standard protocols used to transport data from an AP to a Wireless LAN Controller?

Options:

- A- CAPWAP and GRE
- B- LWAPP and FTP
- C- SSL and SSH
- D- TLS and SSL

P2P  
exams

Answer:

A

## Question 3

---

Question Type: MultipleChoice

---

What inexpensive tool is capable of locating neighbor WLANs if that is your only need?

Options:

- A- WLAN scanner
- B- Site Survey software
- C- Spectrum Analyzer software
- D- Wireless-Specific Protocol Analysis software

Answer:

A

## Question 4

Question Type: MultipleChoice

What document can be useful when determining client capabilities in a WLAN design project?

Options:

- A- Bill of Materials
- B- Certificate of ownership
- C- Purchase receipt
- D- Specifications sheet

Answer:

D

## Question 5

Question Type: MultipleChoice

What is a typical characteristic of barcode scanners?

Options:

- A- Low throughput requirements
- B- High throughput requirements
- C- Implementation of 3x3 3 chipsets
- D- No support for any 802.11 security solutions

Answer:

---

A

## Question 6

---

Question Type: MultipleChoice

---

An organization has chosen to implement Wi-Fi 6E and operates in a regulatory domain allowing the use of all 6 GHz channels. Why can 40 MHz channels be used more easily in this network than one operating in the 5 GHz band?

Options:

---

- A- Because ACI works differently in 6 GHz than in 5 GHz
- B- Because many more channels are available
- C- Because Wi-Fi 6E supports 40 MHz as a primary channel and ignores 20 MHz primary channels
- D- Because 6 GHz Wi-Fi uses Single Channel Architecture instead of Multiple Channel Architecture

Answer:

---

B
